DETAILED ACTION

On June 26, 2007, the Applicant filed a pre-appeal brief request. On August 10, 2007, the decision to reopen prosecution was mailed to the Applicant. A non-final follows.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-20 and 22-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sosa (2002/0099607) in view of Walker (6,690,779).

Sosa discloses the invention substantially as claimed; however, Sosa does not disclose an award being redeemable by the customer for credit toward the purchase of a product from a service provider or calculating an amount of prepaid telephone service credit. Walker teaches a method and corresponding system for awarding and redeeming prepaid telephone time comprising award being redeemable by the customer

for credit toward the purchase of a product from a service provider or calculating an amount of prepaid telephone service credit (col.2, lines 43-60 and col.8, line 50 to col.9, line 24). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Walker within Sosa for the motivation of allowing the user to an alternative prize in the form of credits towards prepaid telephone service.

Response to Arguments

Applicant's arguments with respect to claims 1-20 and 22-51 have been considered but are moot in view of the new ground(s) of rejection.
